

THE ACRYLIC LUNA COLLECTION™

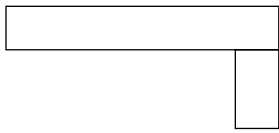

SINK MOUNTING

Solid Surfacing by Formica Group sinks and vanity bowls may be mounted to The Sparkle Collection sheets. Use adhesive that is a match to the color of the sink you are mounting.

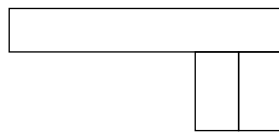

THE ACRYLIC LUNA COLLECTION SERIES EDGE BUILD-UPS

Edge fabrications differ from standard products. Due to the nature of the particulate migration to the surface while casting there may be a visible line using conventional stacked edges. Formica suggests using a single, double dropped edge detail or a miter fold to eliminate the particle rich line.

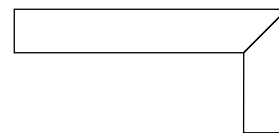

For all other fabrication please refer to the Fabrication Guide Technical Data Manual located under tech briefs.
