

## Formica Infiniti®: Technical Data

Formica Infiniti® High Pressure Laminate meets the performance standards of the International Organization of Standardization, ISO 4586-2, and of the European standard EN 438n and ANSI/NEMA LD3-2005.

### USE AND CARE

Formica Infiniti® may be cleaned with a damp cloth and mild detergent. Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper, etc., will damage the finish and can permanently reduce the stain and chemical resistance of the laminate. Due to the chemical resistant nature of Formica Infiniti®, the use of bleach, ammonium chlorides and other antimicrobials will not harm the surface.

### TEST DATA

Full copies of a specific test report can be obtained by calling Formica Group. All reports from independent research organizations and test labs apply only to the actual specimen or specimens studied and not to any similar materials or product nor to any production run of such material or products. Any information or suggestion concerning applications, specifications or compliance with codes or standards is provided solely for your convenient reference and without any representation as to accuracy or suitability. Formica Group disclaims any legal responsibility. The user must verify and test the suitability of any information or products for their own particular purpose or specific application.

### COLOURS AND PATTERNS

Note: Colour will tend to shift from standard laminate. Request a sample for true colour representation.

### TECHNICAL SERVICES

Technical assistance may be obtained through your local Formica® Brand Products Distributor or from Formica Group trained representatives in sales offices throughout Europe. For the most current technical information, go to [www.formica.com](http://www.formica.com).
