About Formica

## INTRODUCTION

# Our Story behind this Collection

### Elegantly sensual to the eye and the touch

Welcome to our latest collection, where we take beauty beyond the surface. Now offering a complete solution for home and office décor, our exquisitely crafted furniture and products feature texturised surfaces and premium materials, delivering both style and substance for exceptional interiors.

## Professional Craftsmanship

Our expert craftsmanship begins with precision bonding, using advanced press technology to eliminate manual gluing and ensure seamless adhesion. By crafting from full panels before cutting and assembly, we guarantee smooth, flat surfaces. Our high standards extend to using hot melt edge banding for solid colours, paired with meticulous post-processing and rigorous quality checks to achieve flawless, smooth edges - quality and reliability, built to last.

## How We Add Value

**Professional Craftsmanship**  
Quality and reliability, built to last.

**Safe Materials**  
Giving you the peace of mind that your space is as safe as it is beautiful.

**Distinctive Design**  
A curated selection of standout designs that are simply part of the furniture.

## Safe Materials

At the heart of our craftsmanship is a deep commitment to your safety and well-being. We carefully select materials that are as safe as they are durable, avoiding toxic substances and volatile organic compounds that release harmful vapors. Instead, we use PVA/PVAc wood glue, commonly trusted in children's crafts, ensuring both strength and safety.

Our products are GREENGUARD and GREENGUARD Gold certified, meeting the highest indoor air quality standards. But we don't stop there. We conduct regular testing at globally recognised labs to ensure every piece meets rigorous global standards, giving you the peace of mind that your space is as safe as it is beautiful.

## Distinctive Design

We proudly offer a curated selection of standout designs, featuring FENIX innovative materials, TUET modern deep textures, and Formica Laminates, timeless surfaces that blend classic and contemporary styles. Unlike others, we use double-sided doors, rather than non-descript backings, because true quality matters, inside and out. Our exclusive design combinations aren't found elsewhere, ensuring a unique, hard-to-replicate aesthetic.

With every carefully selected material and component, we deliver interiors that make a lasting impression, where distinctive design is simply part of the furniture.

# FORMICA Furniture

Imagine walking into a space that not only looks luxurious but also feels inviting. With our innovative solutions for modern living, you can customize furniture to reflect your personal style and meet your functional needs. Whether you're looking to furnish your living room, dining area, or bedroom, our collection offers a range of configurations that cater to every taste.

## Benefits

**Functional Design**  
Balances aesthetics with practical everyday usability.

**Varied Configurations**  
Offers diverse options to suit individual tastes.

**Cross-Material Option**  
Use any material in the range (incl. TUET, FENIX, Formica)

# TUET

Veneer Edgeband

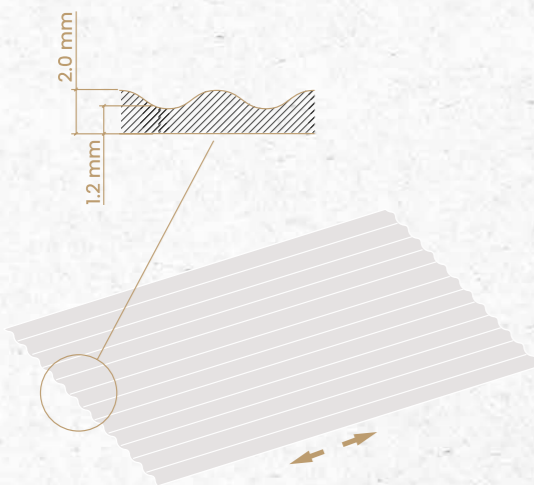

## Deep Surfaces

TUET reveals the harmony of fluid contrasts, **visually and tactilely**. By immersing into the waves of the deep surface, the light transforms each furnishing scene into an evocative composition characterised by light and shadow, which varies according to the time of day.

# FENIX®

Italian design since 2013

Created with proprietary technologies, the external surface of FENIX is characterised by the use of next-generation acrylic resins, hardened and fixed through an Electron Beam Curing process. Experience the difference.

FENIX is a powerful system including innovative materials and interior solutions to create design elements suitable for a wide range of applications and market sectors.

 Low light reflectivity

Round cutout

# Structure

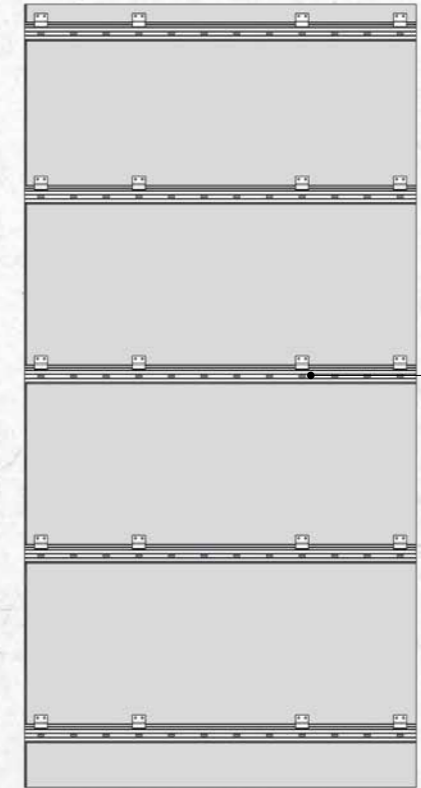

Formica Wall Cladding features a significantly slimmer profile than traditional 50mm wood framing, delivering a sleek, modern aesthetic without compromising strength or stability. Its reduced thickness maximizes interior space, making it ideal for compact areas or projects focused on space efficiency - all with a clean, professional finish.

# Hanger

Façade

Back

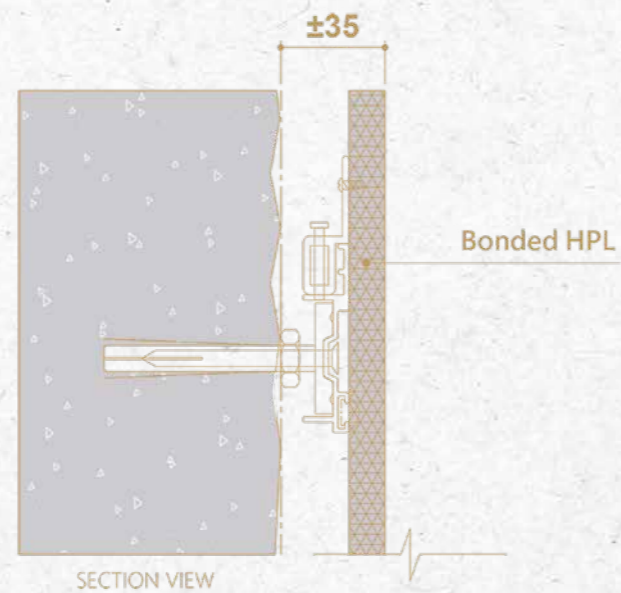

Hanger

Formica Wall Cladding adapts seamlessly to various surfaces—including brick, cement, painted walls, and wallpapered bases. Its adhesive-free installation reduces material costs, streamlines the process, minimizes disruption, and enhances durability—making it a cost-effective and eco-friendly choice for both new builds and renovations.

**Overall Thickness**  
Nominal 35mm room space, depends on wall flatness

**Surface / Backer**  
Formica Laminate

**Substrate**  
Plywood

# ABOUT THE GROUP

We are part of the leading global group in surface materials. We are FENIX, Formica, Homapal, Arpa, Westag, Trespa, Hartson-Kennedy and Direct Online Services. All active in material technology. Panels, doors, worktops: our products range from HPL to solid surface, and from decorative metals to FENIX. Our 6,000 employees work in 40 countries around the world and our products are marketed in many more.

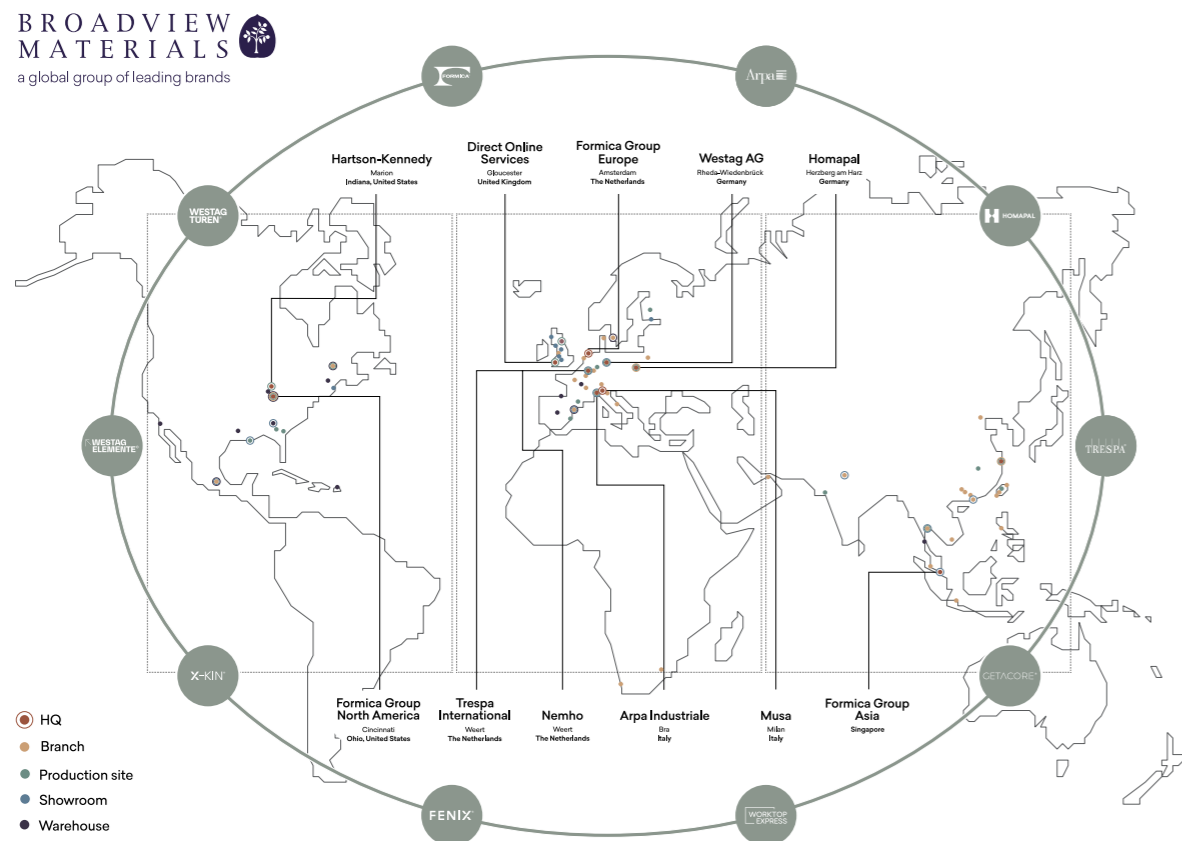

We are not just about creating physical spaces to live, work and play in. We are about setting the stage for a warm and aspirational future. For that reason, we take extraordinary care with the spaces you create. And ensure every detail is crafted to be felt, by touch and by the heart.

# SUSTAINABILITY

Formica Group is a leading provider of stylistic, smart and sustainable surfacing solutions for commercial and residential customers worldwide. Since 1913, the heritage of Formica Group has been founded on quality, service, and innovative product lines.

As the world's largest manufacturer of High Pressure Laminate (HPL), our sustainability policy is built upon being "god" and having a positive impact on the world around us.

# SINCE 1913, FORMICA® DESIGNS FOR TODAY WITH FOREVER IN MIND.

## FORMICA'S FOUNDING

Formica® was founded in Cincinnati in 1913 by two young men, Herbert A. Faber and Daniel J. O'Conor. Their high-pressure plastic resins were intended to serve as electrical insulators replacing mineral Mica, which was used for that purpose at the time. Hence the name "Formica" was chosen. World-renowned artists and architects had also begun to recognize the potential of the decorative laminates and specified them for modernist and art deco interiors.

## FORMICA'S SERVICES

Formica® offers a complete range of surface decorative products with Protec+® technology (High Pressure Laminate, Formica® Compact®, Formica® Custom Graphics™ and FRguard®+), premium decorative products (DecoMetal® by Homapal and FENIX®) and a range of functional products (CHguard™). All Formica® High Pressure Laminates conform to European BS EN438 standards. And meanwhile, we have got the certification of ISO 9001: 2015, ISO 14001: 2015, ISO 45001: 2018, and GREENGUARD.

Formica® owns manufacturing bases worldwide, with five located in Asia. Major bases are located in Shanghai (China), Jiujiang (China), Hsinchu (Taiwan), Bangkok (Thailand) and Ahmedabad (India).
