FORMICA COLLECTION

The building blocks of your imagination.

Surfaces that ignite the senses.
Surfaces that care for your space so you can live in them better, longer.

As Makers Of Change, One Surface At A Time, Formica creates next-generation surfaces that bring meaning to your cherished spaces. Formica surfaces are fundamental building blocks that impart life and energy to your rooms. Now available in Indonesia, our distinctive collections are transportive, whether to outer or inner worlds. Versatile, enigmatic, alluring — they are as eye-catching or as understated as you design them to be.

Armed with cutting-edge PROTEC+[®] technology[^], Formica's surfaces possess safe antimicrobial properties that shows a reduction in bacteria and mould count by up to 99%. Harnessing a revolutionary manufacturing process*, Formica[®] Laminate^{PROTEC+} surfaces are designed to work in conjunction with regular cleaning and disinfecting practices to provide enhanced wear and scratch resistant.

[^]This technology does not cover for INCANTO, Metallic Stones, Pearlescent, DecoMetal[®] and FENIX[®] range

* Tested in accordance with JIS Z2801 and ASTM G21

Wood Grains

The world
in your home.

The resonance of towering oaks, the unique tactility of sturdy elms, the magnificent grains of cedar and fir. Fashioned after the richness of the great outdoors, Wood Grains recall the quiet wonders of the natural world.

SINCE 1913, FORMICA® DESIGNS FOR TODAY WITH FOREVER IN MIND.

Herbert A. Faber Daniel J. O'Conor

FORMICA'S FOUNDING

Formica® was founded in Cincinnati in 1913 by two young men, Herbert A. Faber and Daniel J. O'Conor. Their high-pressure plastic resins were intended to serve as electrical insulators replacing mineral Mica, which was used for that purpose at the time. Hence the name "Formica" was chosen. World-renowned artists and architects had also begun to recognize the potential of the decorative laminates and specified them for modernist and art deco interiors.

FORMICA'S SERVICES

Formica® offers a complete range of surface decorative products with Protec+® technology (High Pressure Laminate, Formica® Compact®, ColorCore®, Formica® Custom Graphics™ and FRguard®), premium decorative products (DecoMetal® and FENIX®) and a range of functional products (CHguard™). All Formica® High Pressure Laminates conform to European BS EN438: 2008 standards. And meanwhile, we have got the certification of ISO 9001: 2015, ISO 14001: 2015, ISO 45001:2018, and GREENGUARD. Formica® owns manufacturing bases worldwide, with five located in Asia. Major bases are located in Shanghai (China), Jiujiang (China), Hsinchu (Taiwan), Bangkok (Thailand) and Ahmedabad (India).

FORMICA'S LOGO HISTORY

As a professional word, "Formica" has been recorded in The Oxford English Dictionary as a replacement for decorative laminates.

CHAMPIONING SUSTAINABILITY THROUGH FORMICA® SURFACES.

GREENGUARD CERTIFICATION

Formica Group has taken significant steps to ensure that its products promote a healthy indoor air quality in homes, offices, schools and other indoor environments. According to the US Environmental Protection Agency (USEPA), the most effective way to reduce indoor air pollution is to reduce or eliminate harmful chemical emissions. Formica® takes pride in meeting the strict emissions limits of the GREENGUARD Environmental Institute and in achieving GREENGUARD Certification for Indoor Air Quality for Formica® Laminates. Formica® Laminates, ColorCore®, Compact® and DecoMetal® are certified in Asia according to the GREENGUARD Certification and GREENGUARD Gold Certification standards for Indoor Air Quality. Formica® FRguard® is certified with GREENGUARD Certification for Indoor Air Quality.

SINGAPORE GREEN LABEL

Formica® Laminates and Formica® Compact® Grade Laminate are Singapore Green Label certified by the Singapore Environment Council under "Environmentally Preferred Surface Covering".

SINGAPORE GREEN BUILDING PRODUCT CERTIFICATION

The achievement of SGBP certification is a testament to Formica Group's commitment towards making sustainable principles. We are committed to creating innovative products that promote a healthier environment to support sustainable design, and protecting vital resources for future needs via our ongoing efforts to put our green principles in practice through life cycle assessment (LCA), sustainable operations and carbon reduction.
