

Customers selecting this customization option should expect a longer design process, as much like Envision™, Formica Group will require legal documentation (ownership of the art) and customer review and approval of the icon coloration.

Please consider the following guidelines when designing your custom icon for IntenteK™ Wireless Charging Surfaces.

- Formica Group recommends a design that will look good at any direction.
We cannot guarantee directional placement of icons.
- Formica Group cannot PMS or Pantone color match.
- Icon must be circular with a diameter of 25mm or 40mm.
We cannot accommodate unique shapes at this time.
- Icon must either have border or the background of the icon must be a different shade than the laminate décor coloration.
- Formica Group advises against small text or use of reverse text.
For 40mm, font should be 8 point or larger (this recommendation could vary depending upon font type chosen). We do not recommend text on 25mm icon.
- Icon art should be submitted in .eps or .ai file.
- Formica Group will provide an opportunity for customer to review and approve a lab sized version of the icon. Customer may request changes two times.
- Formica Group reserves the right to adjust artwork based on manufacturing requirements.
- Only one custom icon per IntenteK™ Laminate sheet. Must order >99 Charging Zones per icon design.
- When ordering, each custom icon made will be assessed a flat fee of \$150.
Fee must be included on purchase order.
