Hospitality Environments

In hospitality environments, materials play a defining role in shaping the guest experience. From the moment guests arrive to the spaces where they dine, relax, and unwind, surfaces help establish the mood, character, and visual identity of a hotel or restaurant.

The Formica® Portfolio of Surfacing Solutions offers a wide range of materials that balance refined aesthetics with dependable performance. With coordinated colors, textures, and finishes, these surfaces help designers create memorable hospitality spaces that feel elevated while standing up to the everyday demands of high-traffic environments.

Reception Areas

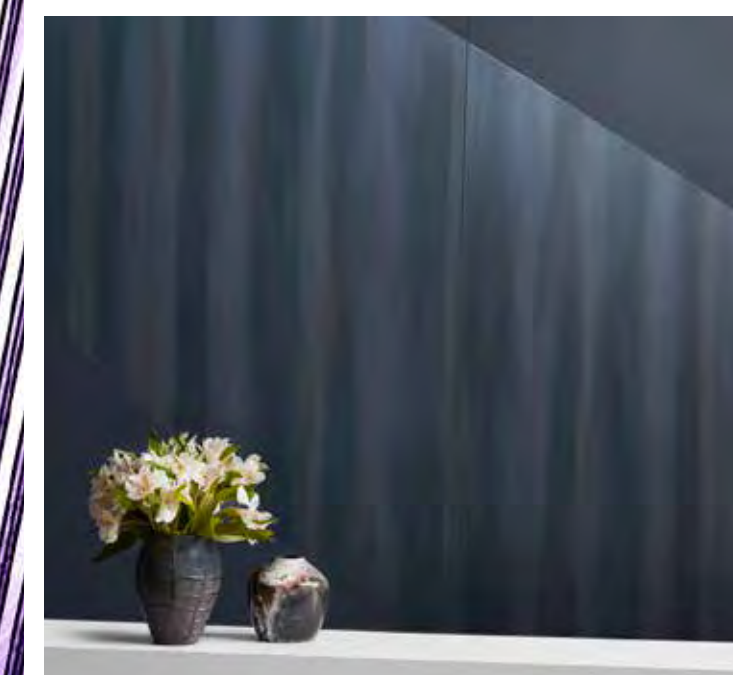

First impressions shaped by surfaces that welcome and inspire.

Arrival spaces create the first impression of a hospitality experience. Reception desks, feature walls, and entry surfaces often set the tone for the design story that continues throughout the property.

The Formica® Portfolio of Surfacing Solutions offers materials that bring visual depth and premium aesthetics to these spaces while providing the durability needed for constant guest interaction.

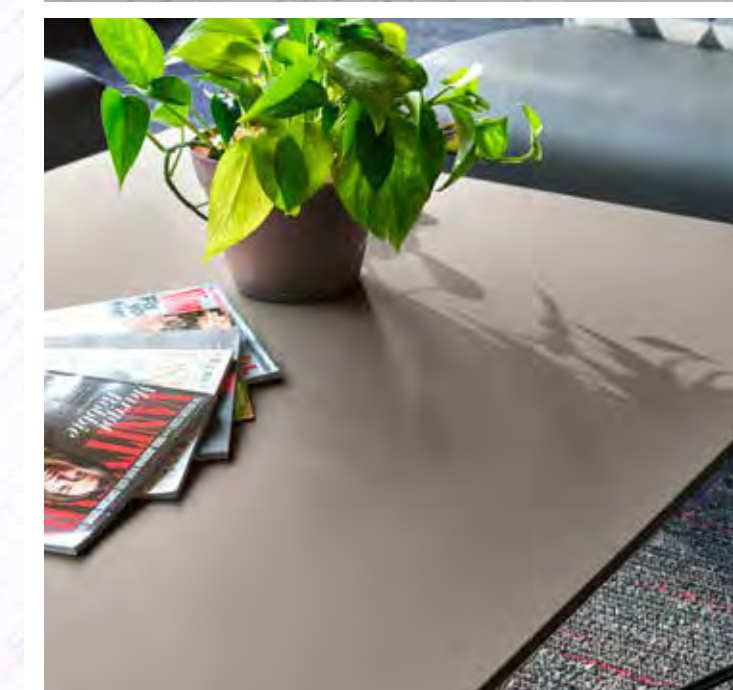

1 Reception counters are often the first tactile moment of a guest's experience. **InDepth Surfacing™** brings dimensional texture and a premium, crafted feel to these surfaces while delivering the durability needed to withstand constant interaction in high-traffic hotel lobbies.

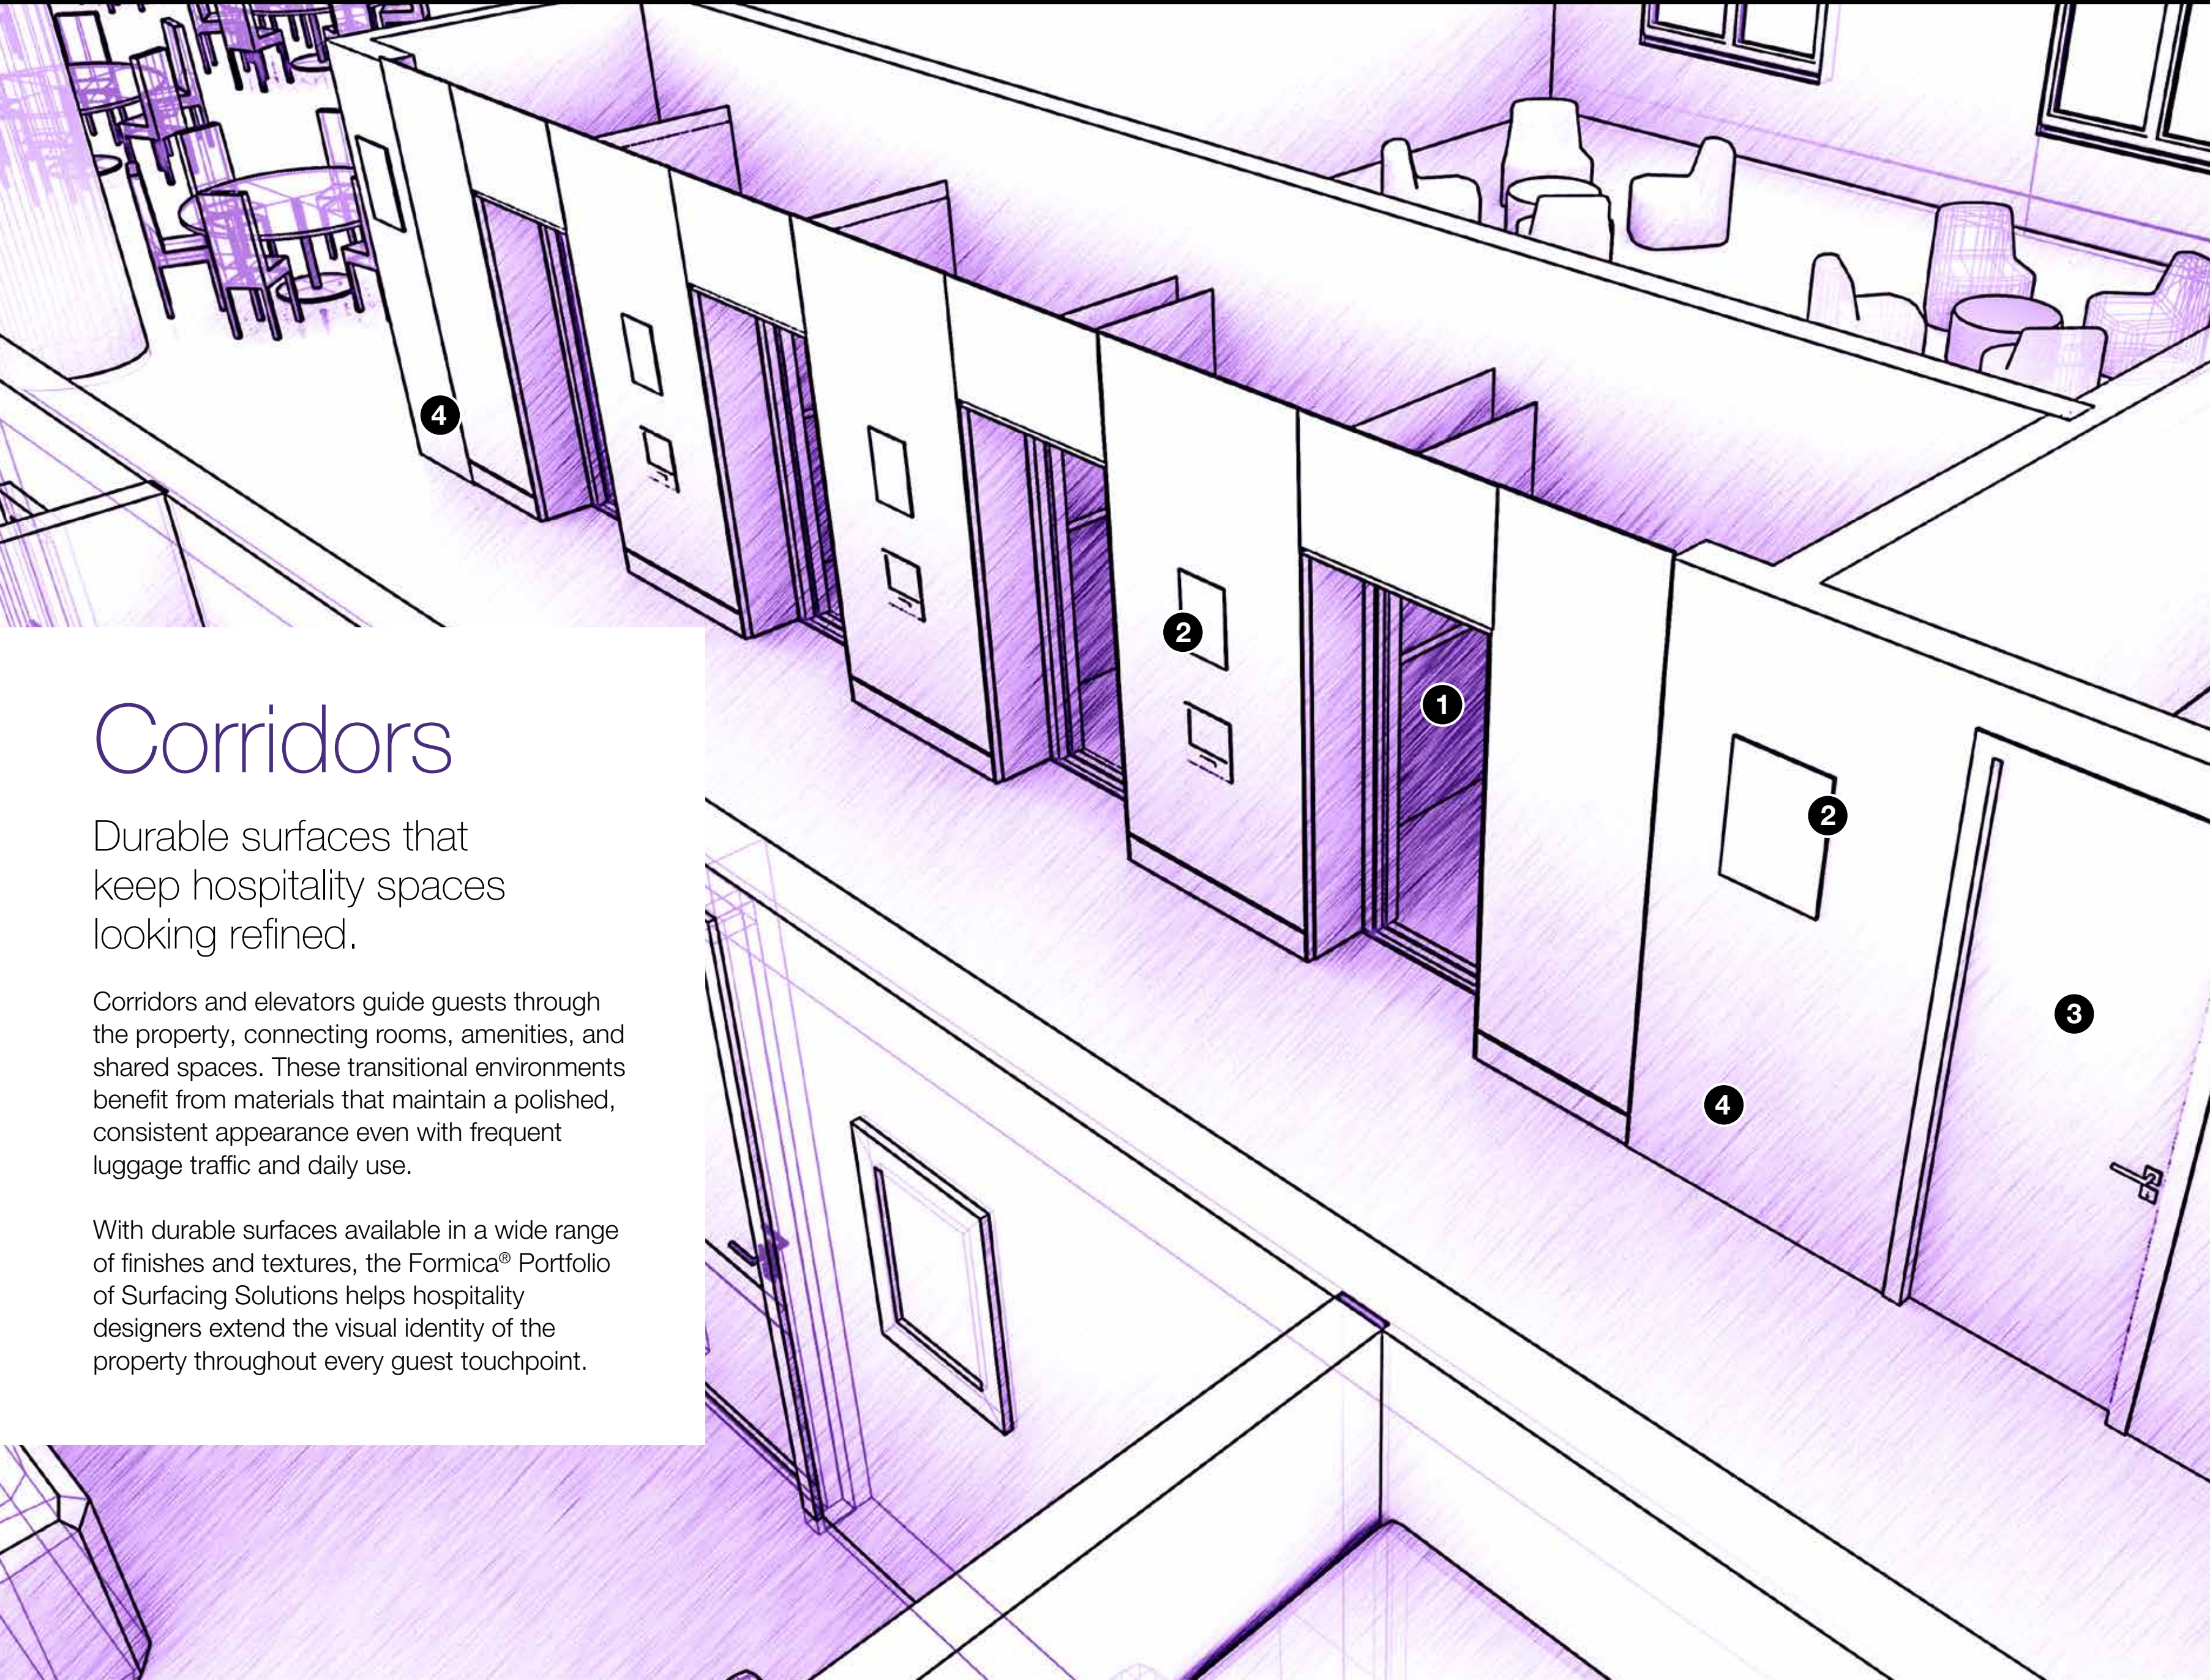

2 Feature walls and focal elements in reception areas set the tone for the entire space. **Homapal® Metals** introduce the richness of real metal, creating a refined, high-end atmosphere that elevates the overall guest experience while maintaining lasting performance.

3 Refreshment areas invite guests to pause and recharge throughout their stay. **Everform® Solid Surface** provides a seamless, nonporous, water-resistant solution that supports easy cleaning and durability, helping these spaces remain polished, hygienic, and ready for continuous use.

4 Seating areas offer moments of relaxation and connection within hospitality spaces. Furniture made with **FENIX® Innovative Materials** deliver a soft-touch, matte surface that brings a sense of quiet luxury while resisting fingerprints and wear, helping lounges feel refined and effortlessly maintained.

Corridors

Durable surfaces that keep hospitality spaces looking refined.

Corridors and elevators guide guests through the property, connecting rooms, amenities, and shared spaces. These transitional environments benefit from materials that maintain a polished, consistent appearance even with frequent luggage traffic and daily use.

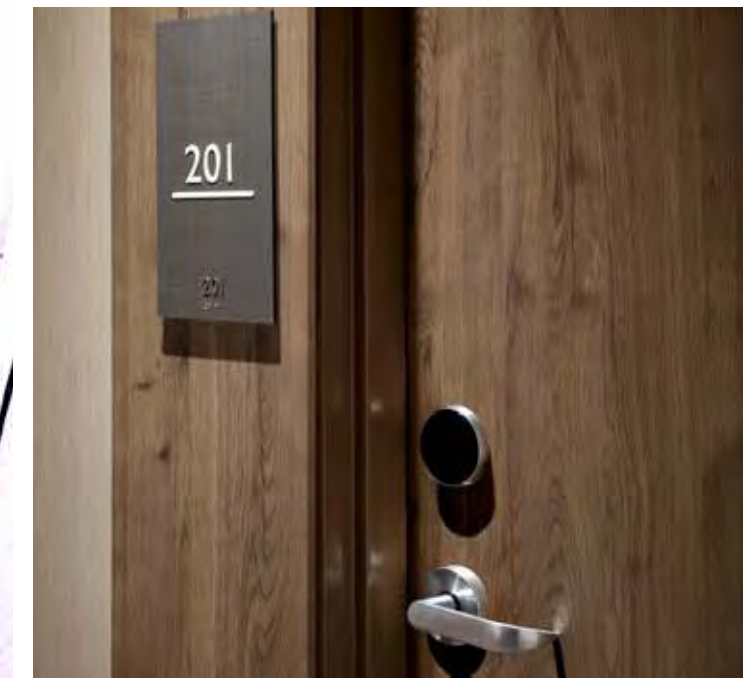

With durable surfaces available in a wide range of finishes and textures, the Formica® Portfolio of Surfacing Solutions helps hospitality designers extend the visual identity of the property throughout every guest touchpoint.

1 Elevator interiors experience constant contact from luggage, carts, and daily guest traffic. **Formica® Compact** delivers superior durability to withstand impact while offering a wide range of colors, patterns, and woodgrains that align seamlessly with any design vision.

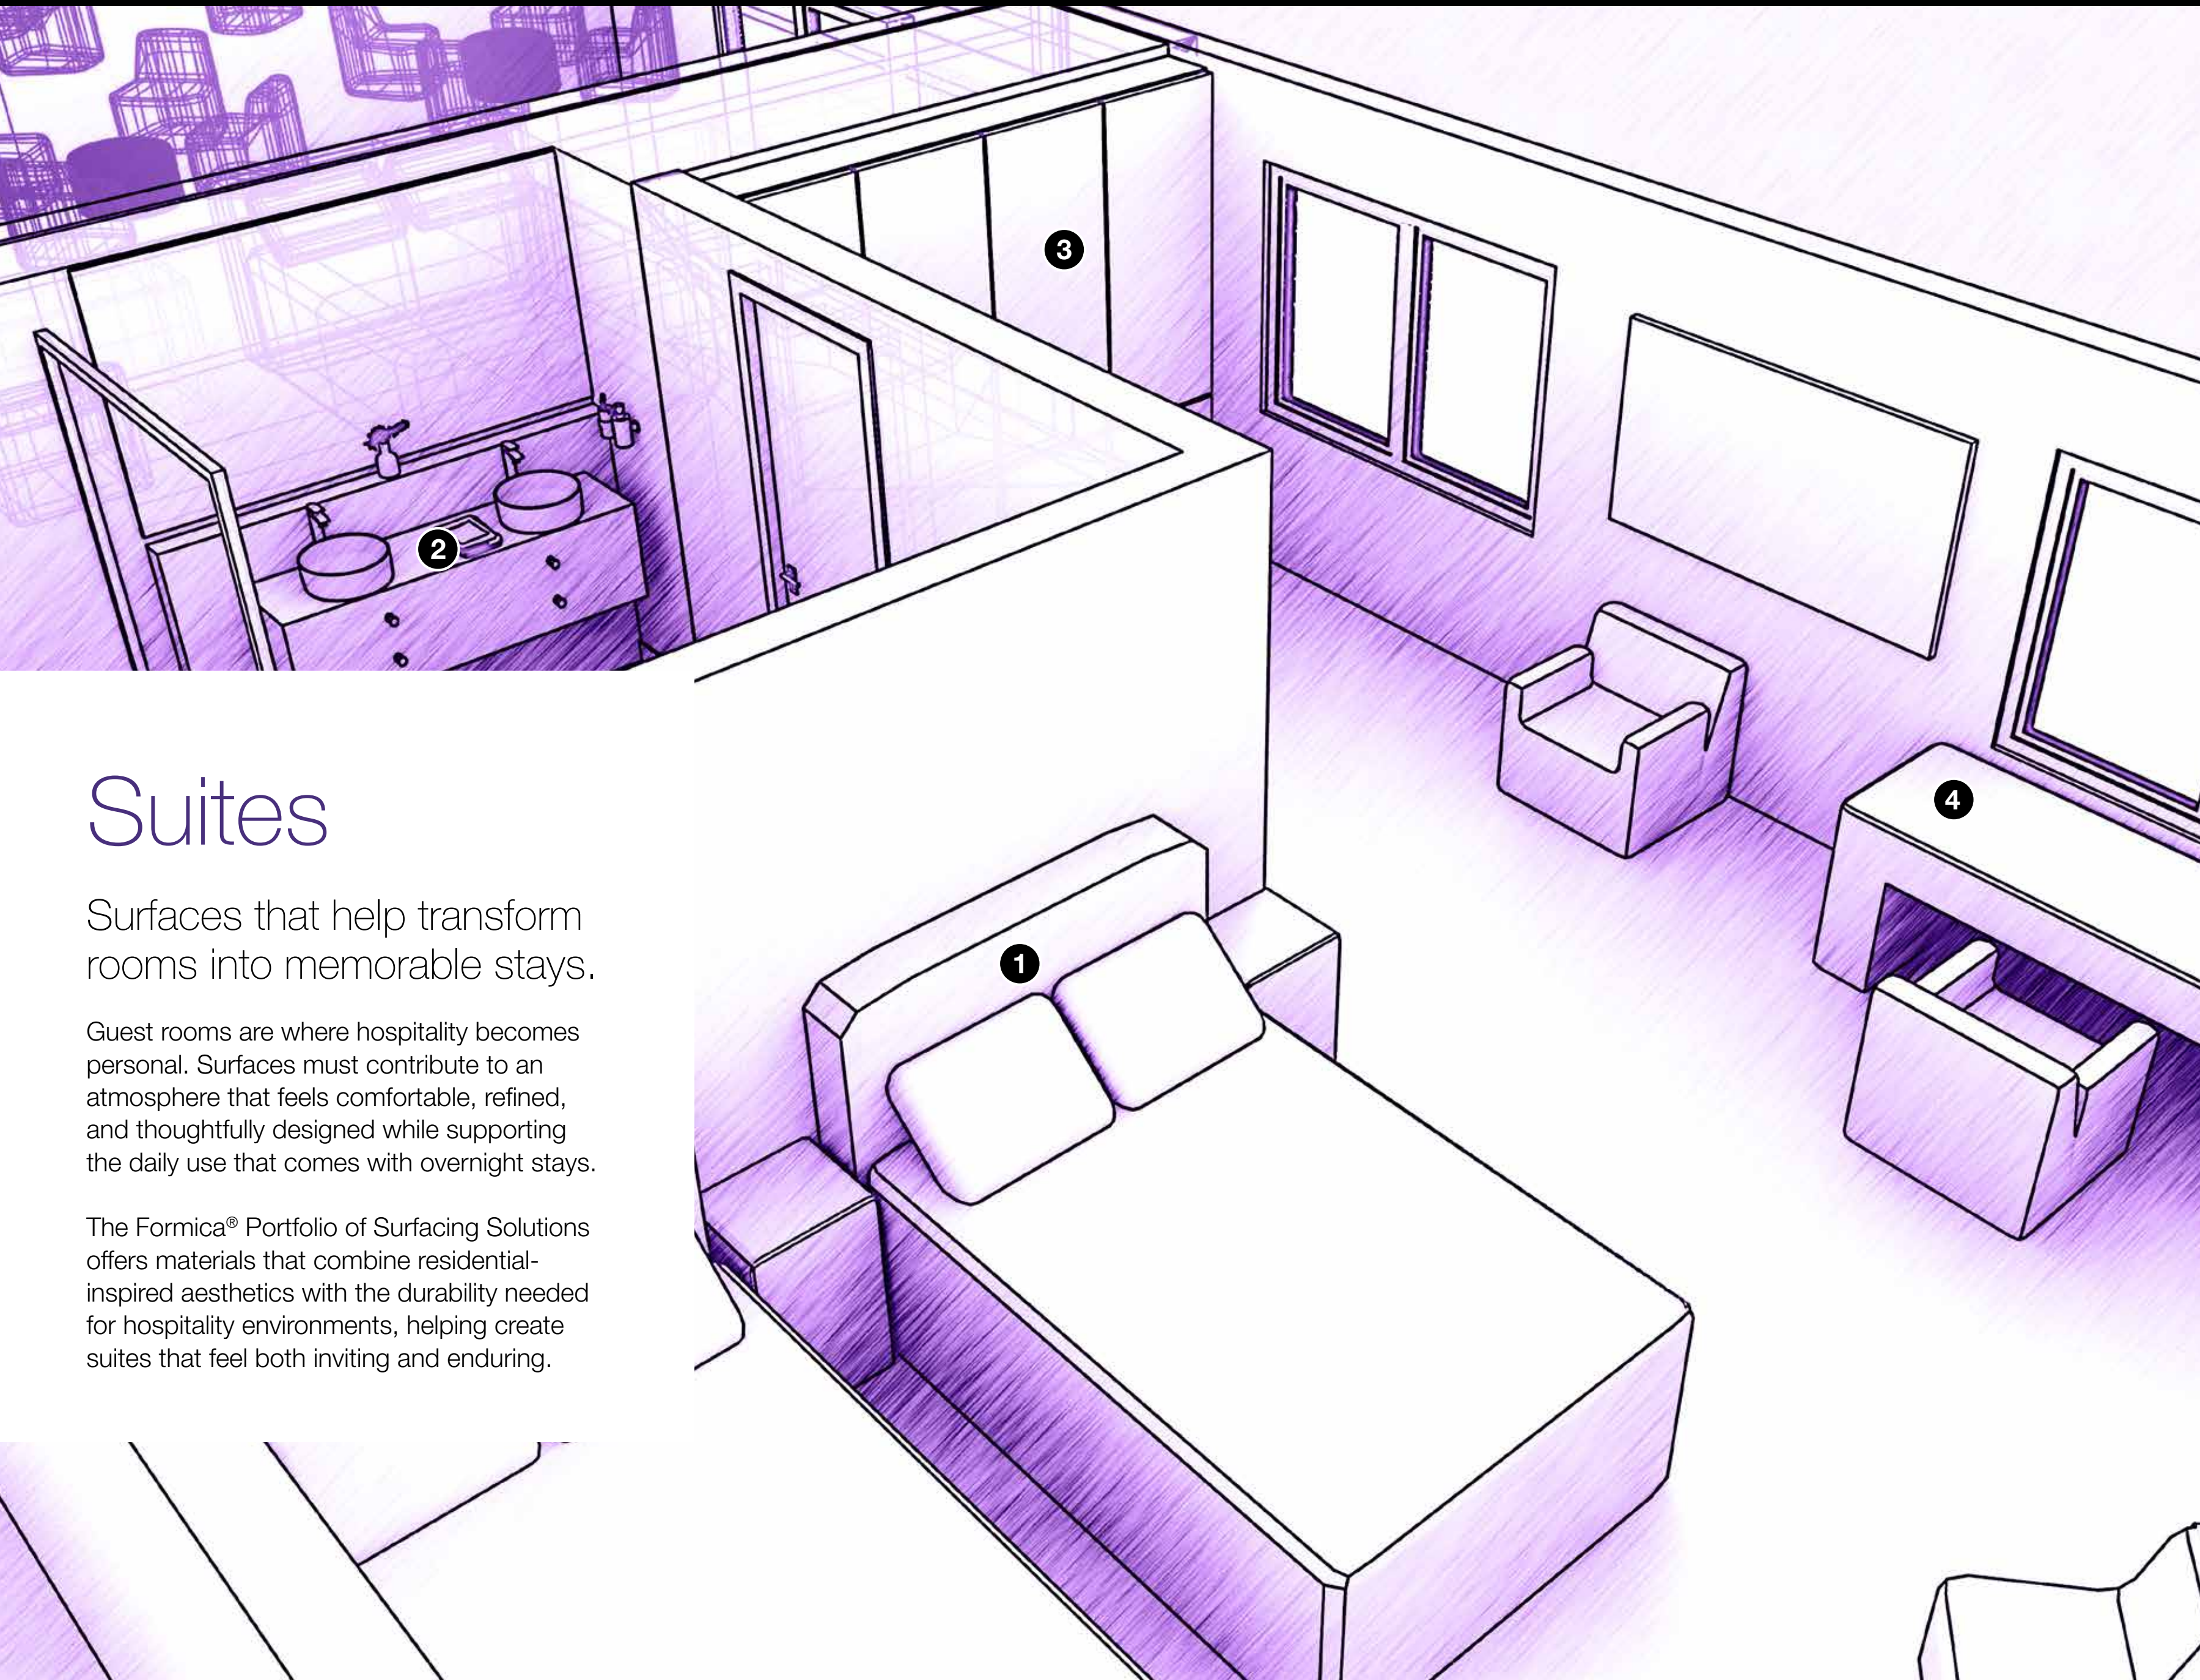

2 Wayfinding and suite signage should feel integrated into the overall design experience. **Homapal® Metals** bring the richness of real metal to these elements, creating refined, highly visible details that elevate both navigation and the overall sense of place.

3 Suite doors are a highly visible and frequently used element throughout any hotel. **Formica® Laminate** offers a durable, long-lasting solution with an extensive range of sophisticated designs, making it easy to achieve a consistent, high-end look that performs reliably across every guest floor.

4 Hallways carry the rhythm of the guest journey and require surfaces that hold up without compromising design. **HardStop® Wall Protection Panels** provide exceptional impact resistance alongside a broad palette of colors and designs, helping corridors remain polished and cohesive over time.

Suites

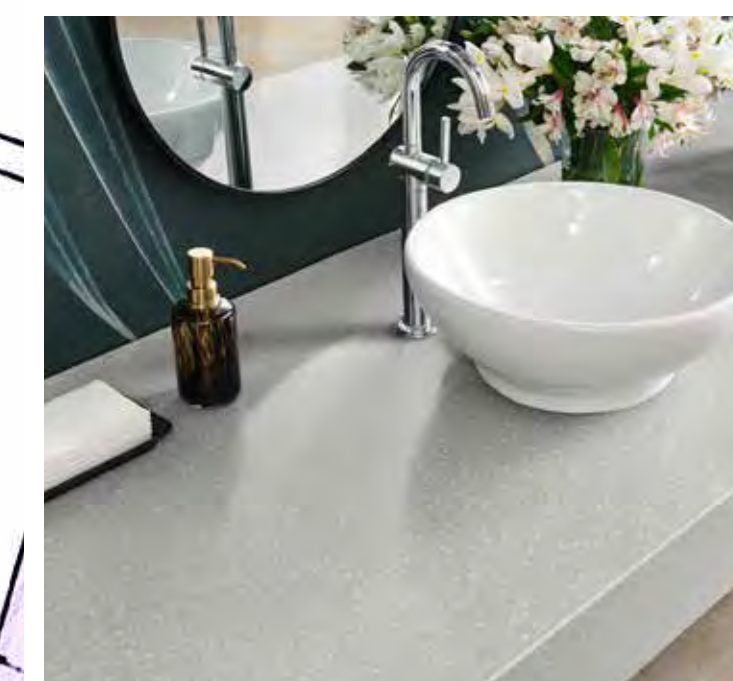

Surfaces that help transform rooms into memorable stays.

Guest rooms are where hospitality becomes personal. Surfaces must contribute to an atmosphere that feels comfortable, refined, and thoughtfully designed while supporting the daily use that comes with overnight stays.

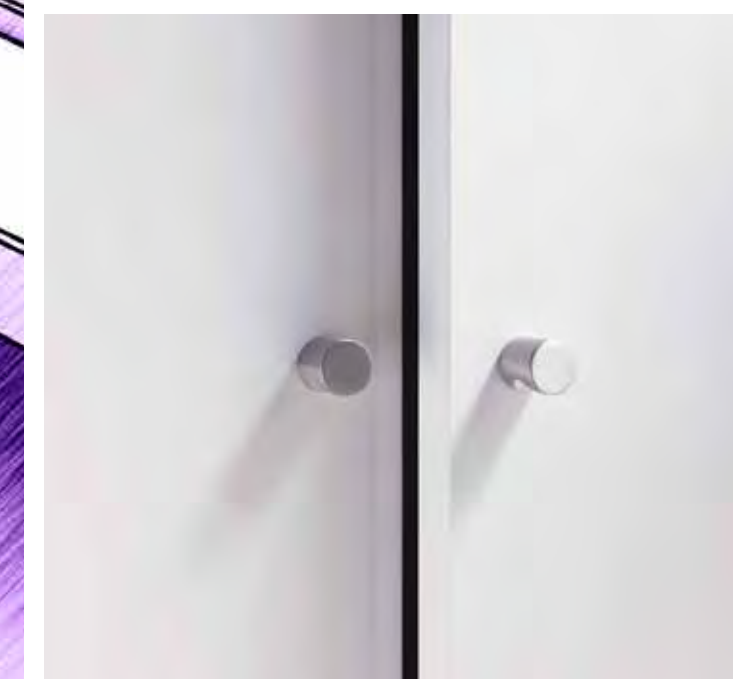

The Formica® Portfolio of Surfacing Solutions offers materials that combine residential-inspired aesthetics with the durability needed for hospitality environments, helping create suites that feel both inviting and enduring.

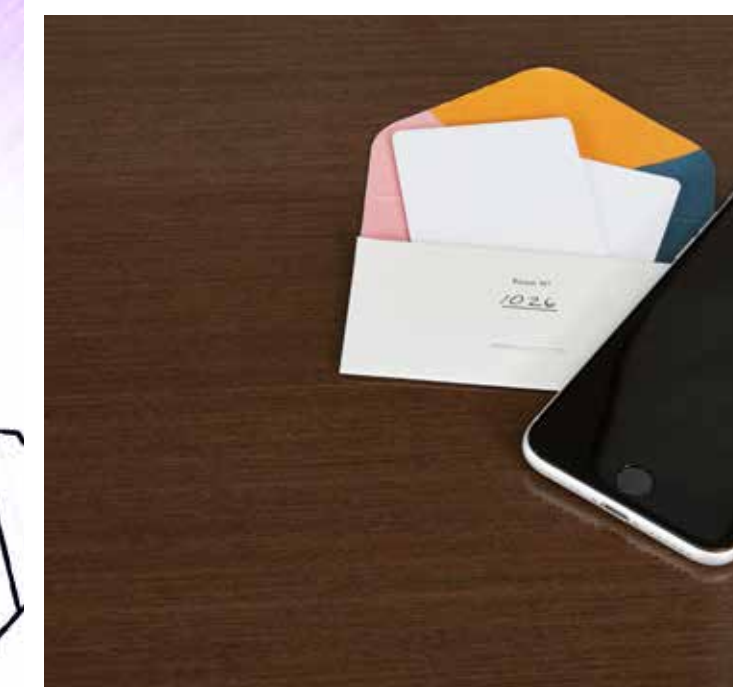

1
The headboard anchors the guest room and sets the tone for rest and relaxation. **Arpa® Laminate** and **Arpa® TUET** bring depth, texture, and a crafted, tactile quality to this feature element, creating a refined focal point that enhances the overall guest experience.

2
Vanity areas require surfaces that feel clean, refined, and easy to maintain. **Everform® Solid Surface** provides a seamless, nonporous solution that resists moisture and supports simple upkeep, helping guest bathrooms remain polished and dependable throughout every stay.

3
Closets and casework benefit from materials that feel seamless and intentional. **ColorCore®2** and color-through **FENIX®** materials eliminate visible edges, delivering a clean, monolithic look that maintains its refinement through everyday use.

4
In-room desks balance function with comfort, supporting both work and relaxation. **Formica® Laminate** woodgrains bring the warmth and familiarity of natural materials while offering the durability needed for consistent, everyday use.

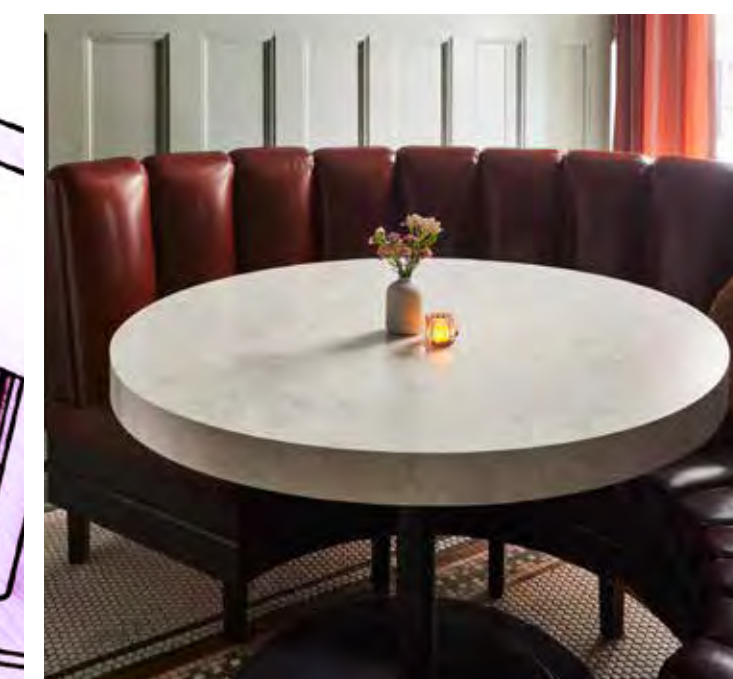

Dining Areas

Materials that set the stage for memorable dining experiences.

Dining spaces are often the social heart of hospitality environments. From hotel bars to restaurants and cafés, surfaces play a key role in shaping atmosphere, supporting service, and reinforcing the design concept.

The Formica® Portfolio of Surfacing Solutions provides materials that bring visual impact and durability to hospitality dining environments, helping spaces remain beautiful and functional through every service.

1
The bar front sets the stage for the entire dining experience. **InDepth Surfacing™** adds dimensional texture and a crafted, high-end feel, creating a striking focal point that stands up to the energy and activity of busy service hours.

2
Bar tops see constant interaction from guests and staff alike. **Everform® Solid Surface** delivers a seamless, nonporous, water-resistant surface that supports easy cleaning while maintaining a smooth, refined appearance through every service.

3
Dining tables bring guests together and shape the overall atmosphere. **180fx®** offers large-scale, realistic patterns that elevate the look of natural materials while providing the durability and easy maintenance needed for high-turn restaurant settings.

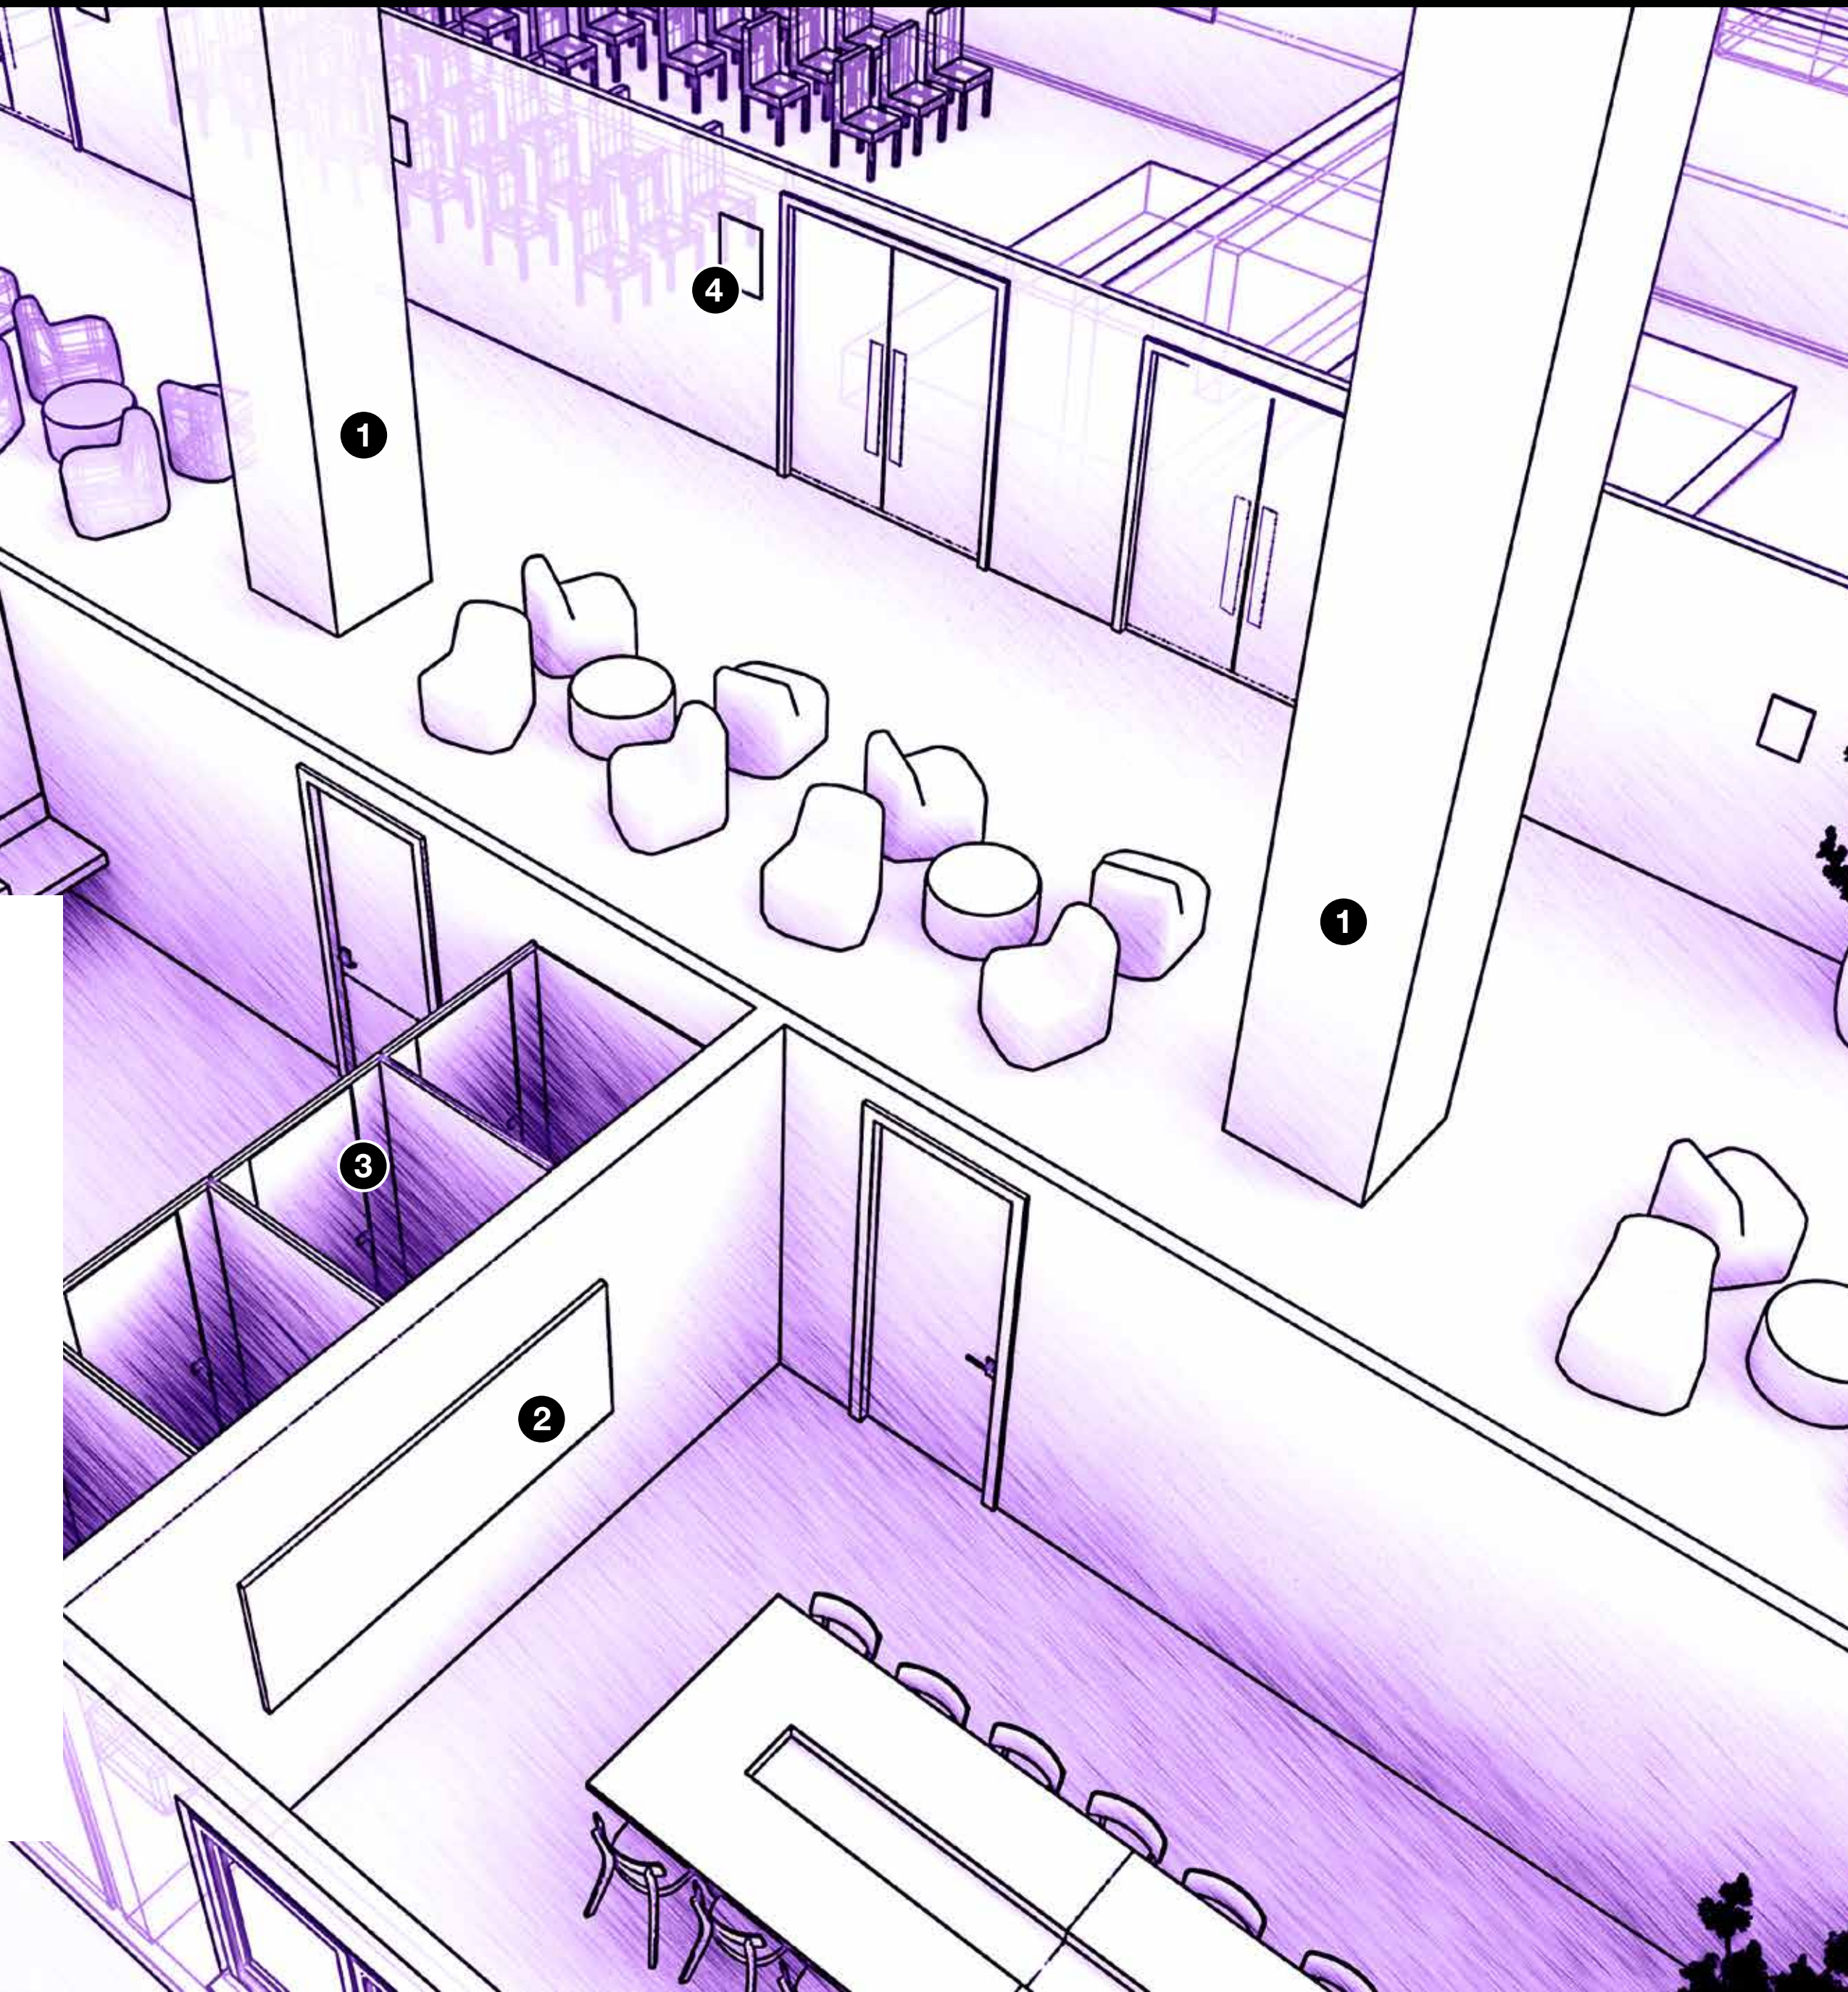

4
Atmosphere is everything in hospitality dining spaces. **Formica Envision™** enables custom graphics and branded elements that define the mood, creating immersive environments that feel unique to each property.

Conference Areas

Materials that transform flexible spaces into memorable event experiences.

Event spaces in hospitality settings host everything from meetings to weddings and large gatherings, requiring surfaces that combine visual impact with durability.

The Formica® Portfolio of Surfacing Solutions delivers versatile materials that support refined, high-use environments for every event.

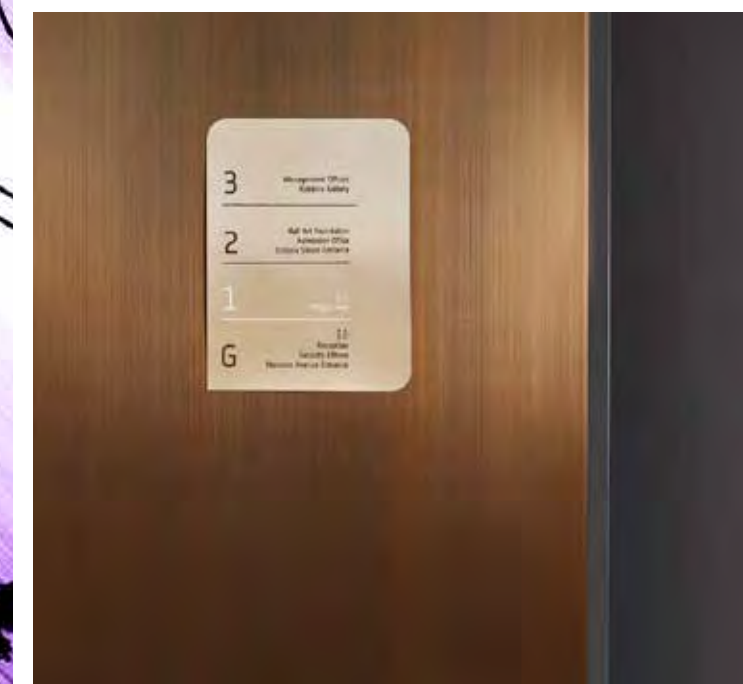

1 Columns in event and conference spaces see constant contact from guests, furniture, and equipment. **TRESPA® TopLab Vertical** provides a highly durable surface that resists impact while maintaining a clean, cohesive look throughout the entire space.

2 Meeting rooms benefit from surfaces that support both function and design. **Formica® Markerboard** introduces writable and collaborative areas, while **InDepth Surfacing™** woodgrains add refined, textural elements that elevate the overall experience.

3 Restroom environments require materials that can withstand continuous use while remaining easy to maintain. **Formica® Compact** offers a durable solution that holds up to daily traffic and supports long-term performance.

4 Clear, well-integrated wayfinding enhances the guest experience across large or flexible event spaces. **Homapal® Metals** bring a refined, high-end finish to signage, helping navigation feel intuitive while reinforcing the overall design aesthetic.

Product	Overview	Recommend Applications	Features and Benefits	Certifications
<p>FENIX® Innovative Materials</p>	<p>FENIX® is a next-generation surface material engineered with advanced acrylic resins and Electron Beam Curing technology. It features an ultra-matte appearance, soft-touch feel, low light reflectivity, and built-in anti-fingerprint resistance. Thermal healing technology allows superficial micro-scratches to be repaired, making it ideal for high-touch interiors.</p>	<p>Countertops Cabinets and casework Tables and furniture</p>	<p>Soft touch Extremely matte Resists fingerprints Nonporous Low light reflectivity Thermal healing of microscratches is possible</p>	<p>NSF® Certified Greenguard™ Gold EPD® and HPD™ FSC® Certified</p>
<p>Homapal® Metal Laminates</p>	<p>Homapal® Metal Laminates combine real aluminum, copper, brass, and stainless steel foils with high-performance laminate construction. Advanced embossing and finishing techniques create distinctive textures. These laminates are ideal for vertical installations like feature walls, casework, signage, and integrated magnetic applications.</p>	<p>Feature walls Decorative casework Decorative Ceiling elements Signage Magnetic applications</p>	<p>Wide range of designs and patterns Consistency of material quality and visual Ease of fabrication Ease of cleaning and maintenance Artisan craftsmanship Magnetic and magnetic markerboard options available Several solid metal decors available</p>	<p>Greenguard™ Gold - Indoor Air Quality Certified® Class 1/A Fire-rating EPD® and HPD™ FSC® Certified (Metal Laminates only)</p>
<p>Formica® Laminate</p>	<p>Formica® Laminate* is a high-pressure decorative surfacing material engineered for durability, versatility, and design flexibility. It offers a broad range of solid colors, woodgrains, patterns, and textures to support performance-driven design across varying budgets. Ideal for horizontal and vertical interior applications in commercial and healthcare environments.</p>	<p>Countertops Cabinets and casework Tables and furniture Doors and partitions</p>	<p>Widest range of design, color, textures and gloss level options Scratch, wear and impact resistance Ease of fabrication Ease of cleaning and maintenance Postformable Nonporous, hygienic</p>	<p>NSF® Certified Greenguard™ Gold - Indoor Air Quality Certified® LBC Red List Approved USDA Biopreferred - 72% EPD® and HPD™ FSC® Certified</p>
<p>InDepth Surfacing™</p>	<p>This innovative product category incorporates the latest technology to create a synchronized, embossed matte texture with light-reflecting details. The resulting high-performance laminate surfaces draw the eye with luxe metallic elements, real wood veneer visuals and textural realism.</p>	<p>Reception Desks Bar tops and bar fronts Countertops Cabinets and casework Tables and furniture Doors and walls Columns and partitions</p>	<p>Synchronized embossed texturing and pearlescence highlights for exceptional realism Scratch, wear and impact resistant Ease of fabrication Ease of cleaning and maintenance Postformable</p>	<p>NSF® Certified Greenguard™ Gold - Indoor Air Quality Certified® FSC® Certified</p>
<p>Arpa® Laminate</p>	<p>Arpa® Laminate is a high-pressure decorative surface manufactured in Italy, combining durability with refined design. It features deep textures and natural woodgrain tonal variation across a curated range of finishes. Suitable for commercial interiors including hospitality, healthcare, retail, and workplace environments, with North American stocking for consistent availability.</p>	<p>Countertops Cabinets and casework Tables and furniture Doors and partitions</p>	<p>Known for deep textured woodgrains and TUET Scratch, wear and impact resistant Ease of fabrication Ease of cleaning and maintenance Nonporous, hygienic</p>	<p>NSF® Certified Greenguard™ EPD® FSC® Certified PEFC™ Certified</p>
<p>Everform® Solid Surface</p>	<p>Everform® Solid Surface is a non-porous, homogeneous material engineered for seamless fabrication and long-term durability. Its resistance to moisture, stains, and bacteria makes it well suited for clinical, food service, and high-use commercial environments. The material thermoforms easily for integrated sinks, backsplashes, and custom features with minimal visible seams.</p>	<p>Countertops Sinks Reception desks Cafeteria Window sill</p>	<p>Design flexibility: wide range of design options Seamless design Durable and wear resistant Nonporous, hygienic Thermoforming capabilities Water resistant Ease of cleaning and maintenance Renewable and repairable</p>	<p>NSF® Certified Greenguard™ Gold - Indoor Air Quality Certified® LBC Red List Free** Class 1/A Fire-rating EPD®</p>
<p>HardStop® Wall Protection Panels</p>	<p>HardStop® Decorative Wall Protection Panels are engineered with a treated fiberglass core for enhanced impact, scratch, and fire resistance. Designed for fast, efficient installation, they provide Class A fire performance and long-term wall protection in demanding environments.
